ANNOUNCEMENTS

Dear Members,

We want to thank you for having contributed to the success of the 62nd SIB Congress held last September in Florence. The following numbers testify the great vitality of our community:

431 Registered Participants
27 Invited speakers
279 Submitted Abstracts
17 Selected Short Talks
255 Posters
18 Sponsors
11 Exhibitors

We are working to ensure the great success of the 48th FEBS Congress that will be held from June 29 to July 3, 2024, in Milan, preceded by the 23rd FEBS Young Scientists' Forum taking place in Pavia from June 26 to June 29.

In this newsletter you will find further information on both events, and we warmly invite you to take part!

The [48th FEBS Congress 'Mining biochemistry for human health and well-being'](#) will be held in Milano from June 29th to July 3rd, 2024.

The congress will present a broad-spectrum and ground-breaking scientific program, completed in a fruitful collaboration with the journals of FEBS and representatives from FEBS Constituent Societies. The focus on human health and well-being, through molecular and cellular science approaches, reflects a key social issue and a specific commitment of SIB and the whole biochemical community in a time of ongoing global transitions. Besides important research topics following the latest and emerging developments in the biochemical sciences, the Congress activities will include dedicated education-oriented sessions, symposia organized by young biochemists, and biochemistry-related economic discussions. There will also be opportunities for presentations from industry of the latest advances in commercial instrumentation.

Deadlines

YSF Abstract Submission deadline: December 7, 2023

SIB Bursary Abstract submission deadline: February 1, 2024

FEBS Bursary Abstract submission deadline: March 8, 2024

Main Abstract Submission deadline: March 8, 2024

Registration deadline for abstract submitters: March 8, 2024

The [FEBS Young Scientists' Forum 2024](#) will be held in Pavia from June 26th to June 29th, 2024.

The YSF 2024 aims to provide a unique forum for young scientists to present their work, discuss new methods and cutting-edge technologies, be challenged by emerging debates, and build a fruitful network with peers around Europe. Experienced mentors and trainee moderators will facilitate active participation in scientific discussion to allow all attendees to be engaged as participants rather than spectators. The scientific focus of the invited speaker program will be sustainability and the importance of molecular details in cell function and physiology. As alluded to by the slogan of the YSF logo, the interdisciplinary nature of biochemistry will bridge the gap between different disciplines supporting progress of humanity in areas such as health, agriculture and the environment.

The event will host about 100 selected PhD and young postdoc researchers in biochemistry and molecular biology. Their registration and accommodation expenses, as well as most of the travel costs for both the YSF and FEBS Congress, will be covered by YSF grants from FEBS. Details on how to apply, including eligibility criteria, can be found on the [YSF Applications page](#).

Deadlines

YSF application deadline: December 7, 2023.

Notifications of YSF award winners: February 13, 2024

Fellowships for participation to FEBS 2023

The SIB awards 100 grants, € 295,00 each, to encourage the participation of SIB young members in the FEBS 2024. Candidates must fulfill the following requirements:

1. be regularly registered to SIB as a Young Member;
2. be under 35 by the call deadline;
3. be the presenting author of a submitted abstract to the Congress.

[Submit your application](#) by Feb 1, 2024

SIB also offers 3 additional registration fees for those who contribute a short contest, in which we ask you to produce a video content (in English, max 20 seconds) to promote the Milan congress.

Membership

The Italian Society of Biochemistry and Molecular Biology (SIB) brings together researchers and professionals in the field of biochemistry and molecular biology in Italy. As part of its overall goal of fostering the molecular life sciences, SIB organizes and sponsors several events and supports its Junior members through grant awarding.
